SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

2.1.1 Regulation (EC) No. 1272/2008 (CLP)Skin Sens. 1; H317
Repr. 1A; H360FD

Lact.; H362 STOT RE 1; H372

2.2 Label elements According to Regulation (EC) No. 1272/2008 (CLP)

Product name M-Line 361A-20R Solder

Hazard Pictogram(s)

Signal Word(s) DANGER

Contains: Lead (Massive form) and Rosin

Hazard Statement(s) H317: May cause an allergic skin reaction.

H360FD: May damage fertility. May damage the unborn child.

H362: May cause harm to breast-fed children.

Document No. 14192 Page: 1 of 9

M-Line 361A-20R Solder

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

www.vpgsensors.com Date of issue:06/12/2022 Date of First Issue: 07/08/2012 Version 5.0

H372: Causes damage to organs through prolonged or repeated exposure.

Precautionary Statement(s) P201: Obtain special instructions before use.

P260: Do not breathe fume.

P263: Avoid contact during pregnancy and while nursing.

P280: Wear protective gloves/protective clothing/eye protection/face

protection/hearing protection.

P302+P352: IF ON SKIN: Wash with plenty of water.

P308+P313: IF exposed or concerned: Get medical advice/attention.

Supplemental information None assigned

2.3 Other hazards None

SECTION 3: Composition/information on ingredients

3.1 Substances - not applicable.

3.2 Mixtures

EC Classification Regulation (EC) No. 1272/2008 (CLP)

Chemical identity of the substance	%W/W	CAS No.	EC No.	REACH Registration No.	Hazard classification
Lead Massive form	35 - 40	7439-92-1	231-100-4	Not yet assigned in the supply chain	Repr. 1A; H360FD Lact.; H362 STOT RE 1; H372
Rosin	1 - 5	8050-09-7	232-475-7	Not yet assigned in the supply chain	Skin Sens. 1; H317

Note: For full text of H phrases see section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures Self-protection of the first aider

inhalation

Skin contact

Eye contact

Ingestion

No action should be taken involving personal risk. Wear appropriate personal protective equipment, avoid direct contact. Wear suitable respiratory protective equipment if exposure to high levels of material are likely. Avoid contact with skin. Do not breathe fumes. Remove contaminated clothing.

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. Apply artificial respiration if breathing has ceased or shows signs of failing. IF exposed or concerned: Get medical advice/attention.

IF ON SKIN: Remove contaminated clothing and wash all affected areas with plenty of water. Contaminated clothing should be thoroughly cleaned. If skin irritation or rash occurs: Get medical advice/attention. IF exposed or concerned: Get medical advice/attention.

Molten material can cause severe burns. Do NOT try to peel molten material from the skin. Cool rapidly with water.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if eye irritation develops or persists.

If swallowed, rinse mouth with water (only if the person is conscious). Do NOT induce vomiting. Get medical advice/attention if you feel unwell.

Version 5.0

4.2 Most important symptoms and effects, both acute and delayed

May cause an allergic skin reaction. May damage fertility. May damage the unborn child. May cause harm to breast-fed children. Causes damage to organs through prolonged or repeated exposure.

Flux fumes during soldering may cause irritation and damage of mucous membranes and respiratory system. Smoke produced during soldering will contain rosin which is an allergen and can cause pulmonary irritation and damage. High atmospheric concentrations may lead to adverse effects on the central nervous system and anaesthetic effects, including drowsiness, giddiness, headache, nausea and unconsciousness. Lead is a cumulative poison and continuous exposure to small amounts over time can raise the body's content to toxic levels. Symptoms of lead poisoning include abdominal pain, nausea, vomiting and headache. May cause gastrointestinal tract irritation if s Molten material can cause severe burns.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to a physician:

Treat symptomatically.

If thought to be overexposed, the person should have a blood-lead analysis done. Patient should be kept under medical observation for at least 48 hours. When molten: In case of burns immediately cool affected skin as long as possible with cold water.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media Unsuitable extinguishing media

Do not

As appropriate for surrounding fire.

Do not use water on fires when molten metal is present.

5.2 Special hazards arising from the substance or mixture

Flux in cored solder may ignite when the solder melts in a fire. When heated to soldering temperatures, the solvent in the flux will boil away and carry up droplets of rosin and thermal degradation products such as aliphatic aldehydes, acids and terpenes. No lead or antimony are detected in fumes from soldering below 537°C. Melted solder may liberate carbon monoxide, carbon dioxide, lead oxide fumes. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Do not breathe fumes. Keep containers cool by spraying with water if exposed to fire. Avoid run off to waterways and sewers.

5.3 Advice for firefighters

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

6.2 Environmental precautions

6.3 Methods and material for containment and cleaning up

Large spillages:

6.4

Ensure adequate ventilation Use personal protective equipment as required. See Section: 8. Avoid all contact. Avoid breathing smoke fumes during soldering. Melted solder will solidify on cooling and can be scraped up. Use caution to avoid breathing fumes if a gas torch is used to cut up large pieces.

Avoid release to the environment. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body.

Ensure suitable personal protection during removal of spillages. Allow product to cool/solidify and pick up as a solid. Transfer to a container for disposal. Recover or recycle if possible. Dispose of this material and its container as hazardous waste

Ensure adequate ventilation Use personal protective equipment as required. See Section: 8. Avoid all contact. Melted solder will solidify on cooling and can be scraped up. Avoid breathing smoke fumes during soldering. Use caution to avoid breathing fumes if a gas torch is used to cut up large pieces.

See Section: 8, 13

SECTION 7: Handling and storage

Reference to other sections

7.1 Precautions for safe handling

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Ensure adequate ventilation Avoid all contact. Avoid breathing smoke fumes during soldering. Use caution to avoid breathing

Document No. 14192 Page: 3 of 9

M-Line 361A-20R Solder

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

- 8.1.3 PNECs and DNELs
- 8.2 Exposure controls
- 8.2.1 Appropriate engineering controls
- 8.2.2 Individual protection measures, such as personal protective equipment

Ensure adequate ventilation Or Use appropriate containment. Atmospheric levels should be controlled in compliance with the occupational exposure limit. Local exhaust recommended.

General hygiene measures for the handling of chemicals are applicable. Avoid all contact. Avoid breathing smoke fumes during soldering. Use caution to avoid breathing fumes if a gas torch is used to cut up large pieces. Wash hands before breaks and after work. Keep work clothes separately. Contaminated clothing should be thoroughly cleaned. Do not eat, drink or smoke at the work place.

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier.

Not established

Eye / face protection

Skin protection

Wear eye protection with side protection (EN166).

Hand protection:

Wear impervious gloves (EN374). Gloves should be changed regularly to avoid permeation problems. Breakthrough time of the glove material: refer to the information provided by the gloves' producer.

Hot/molten product: Use gloves with insulation for thermal protection, when needed

Body protection:

Wear impervious protective clothing, including boots, lab coat, apron or coveralls, as appropriate, to prevent skin contact. Hot/molten product: Wear flameproof clothing.

Respiratory protection

In case of inadequate ventilation wear respiratory protection. A suitable mask with filter type A (EN141 or EN405) may be appropriate. Recommended: Dust mask/ Half-face mask (DIN EN 140), Filter type: P2

Thermal hazards

Hot/molten product: Wear appropriate personal protective equipment, avoid direct contact.

8.2.3 Environmental exposure controls

Avoid release to the environment. Do not allow to enter drains, sewers or watercourses.

Kinematic viscosity not applicable - solid Solubility Insoluble in water Partition coefficient: n-octanol/water (log value) Not available Vapour pressure Not available Pensity and/or relative density $>1 (H_2O=1)$ Relative vapour density not applicable - solid

Particle characteristics Not available

9.2 Other information

Explosive properties Not explosive.

Oxidising properties Not oxidising.

SECTION 10: Stability and reactivity

10.1 Reactivity Stable under normal conditions

10.2 Chemical stability
Stable under normal conditions Hazardous polymerisation will not occur.

10.3 Possibility of hazardous reactions Flux in cored solder may ignite when the solder melts in a fire. Reacts vigorously

with chlorine and oxidising agents. Use of strong acid fluxes may result in

liberation of toxic lead chloride fumes.

10.4 Conditions to avoid When molten: Keep from any possible contact with water.

10.5 Incompatible materials Keep away from: Strong Acids, Alkalis, Chlorine and Strong oxidising agents.

Store away from sources of sulfur.

10.6 Hazardous decomposition products When heated to soldering temperatures, the solvent in the flux will boil away and

carry up droplets of rosin and thermal degradation products such as aliphatic aldehydes, acids and terpenes. No lead or antimony are detected in fumes from soldering below 537°C. Melted solder may liberate carbon monoxide, carbon

dioxide, lead oxide fumes.

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity

Ingestion Mixture: Acute Tox. 4; H302: Harmful if swallowed.

Acute Toxicity Estimate Mixture Calculation: estimated estimated LD50 >300 -

≤2000 mg/kg bw/day

inhalation Based upon the available data, the classification criteria are not met.

Acute Toxicity Estimate Mixture Calculation: estimated LC50 > 5 mg/L.

(dust/mist)

Skin contact Mixture: Based upon the available data, the classification criteria are not met.

Acute Toxicity Estimate Mixture Calculation: estimated LD50 > 2000 mg/kg

bw/dav

Skin corrosion/irritationMixture: Based upon the available data, the classification criteria are not met.Serious eye damage/irritationMixture: Based upon the available data, the classification criteria are not met.
