Customer Announcement: Update on U.S. Tariffs

Dear Valued Customer,

We would like to inform you of a recent update to U.S. import tariffs that may affect products imported into the United States. The U.S. government has announced an update to the tariff structure that renews the Section 122 tariffs introduced earlier this year. As part of this update, certain countries have experienced tariff increases related to U.S. forced labor enforcement measures, resulting in a modest increase from the previous 10% tariff rate for some countries.

Updated Tariff Rates Impacting VPG Imports

Country/Region	Tariff Rate
Japan	12.5%
United Kingdom	12.5%
European Union	12.5%
Israel	12.5%
China	37.5%*
India	10%
Taiwan	10%
Canada (USMCA-qualified goods)	0%
Mexico (USMCA-qualified goods)	0%

China tariff rate includes the 12.5% global tariff in addition to existing Section 301 duties.

Important Pricing Notice: At the time your quote was issued, a note was included advising that tariff-related charges were subject to change. As tariff regulations continue to evolve, the final tariff amount applied to your order may differ from the estimate provided on the original quotation. The final amount will be based on the applicable tariff rates, product classification, and actual country of origin in effect at the time of invoicing and importation.

At VPG, we continue to closely monitor tariff developments and assess their impact on our supply chain and product pricing. We remain committed to maintaining transparency with our customers and will communicate any necessary pricing adjustments or business impacts resulting from these changes.

If you have any questions regarding how these tariff updates may affect your orders or specific products, please contact your VPG sales representative.
Thank you for your continued partnership and support.

Sincerely,

Craig Szymczak
