

Micro-Measurements Quality Statement

Micro-Measurements precision strain gages, as well as associated installation accessories and instruments, are a full range of high quality products, backed by technical specialists, for use both in test and measurement applications and in the commercial production of transducers.

A comprehensive Quality Management System, based on the ISO 9001 Standard, establishes controls throughout the entire manufacturing cycle, from design through delivery. This helps assure continuation of the quality of the entire Micro-Measurements product line.

The Micro-Measurements quality objective is to exceed the quality expectations of our customers. This commitment starts with top management and extends throughout the entire organization. It is achieved through innovation, technical excellence, advanced technologies and continual improvement of the quality management systems. Each business unit is obliged to set quality objectives to support the goal. Top management is committed to satisfy applicable laws and regulatory requirements to the company operation and products. It is the responsibility of all company personnel, involved directly or indirectly with our quality objective, to direct their efforts towards the reduction, elimination and prevention of quality deficiencies.
